

*Used for two or three songs during set by TENOR SAX.

Can be muted the rest of the time, but ensure it's on, and tenor sax off, when he grabs a guitar.

AGBEKO STAGE PLAN AND TECHNICAL SPECIFICATIONS

Backline Requirements:

Unless otherwise agreed before the performance, Agbeko will require the following backline from the venue/promotor:

- Drum Kit (Shells and 4 cymbal stands)
- Drum Mat
- Bass Amplifier

Agbeko will provide all percussion, drum kit breakables and amplification unless the usage of in-house equipment has been discussed and confirmed. LET US KNOW if you'd rather we use in house amps (and what they are), and we can easily work something out.

Alto and Bari Sax mic requires Phantom Power. Tenor Sax has own 2.4GHz wireless set up. Let us know if you anticipate this being a problem (Shure GLXD system).

If available then a riser for Drum Kit would be used, as would a percussion riser. It'd look rather fetching.

Below is a flexible list of channels and monitor sends. We understand not all venues have a big enough desk/enough mics for everything so we are happy to be flexible. However please get in touch BEFORE the gig to discuss this.

Trombone and Trumpet mics to be something other than SM58/57s if possible, clip-ons are cool too.

*****AGBEKO DO NOT FIT ON A 16 CHANNEL DESK.***** (Yes, it's happened a lot now.)
